

Curso intensivo

Asset and Liability Management

Lisboa, 7, 8, 10 e 11 de Fevereiro de 2011,
das 09.00h às 15.00h

Formação ministrada em língua inglesa

Objectivos

The course provides a broad knowledge of asset and liability management an insurance company; special focus on management of fixed interest assets; issues in relation to modelling, measuring and simulating risk; and a diversion into Solvency II.

Benefícios

At its most general, insurance activity consists of investing premiums received in assets with the purpose of funding future liabilities. This course will give an insight into asset and liability management from a practical as well as a methodological angle.
