

Product Management and Development

4th-6th March
2010

Hamburg
Germany

Product management is one of the most important tools for insurance companies to develop and sustain winning strategies, as all national Markets are developing into highly competitive environments. The seminar is suited for actuaries or actuarial trainees that are involved in issues with regard to product development and product maintenance within insurance companies. The aim of the seminar is to share views, transfer knowledge and to practice about how product management and development is best implemented and practised.

IFRS – Accounting

15th-17th April
2010

Tallinn
Estonia

Valuation in the context of general purpose accounting is one of the key tasks of actuarial work. More and more companies have to be familiar not only with the national GAAP, but also with the requirements regarding IFRS. The "current" and "market-consistent" measurement integrates a lot of different actuarial techniques and tools that are used in the actuarial practice, i.e. stochastic modelling, margin techniques, data collection, embedded derivatives, hedging methods etc.

Actuarial Modelling

6th – 8th May
2010

Vienna
Austria

This seminar will go back to the basics of actuarial models, explore the shortcomings of popular techniques, and equip participants with a better understanding of how models should be applied in practice. The course is based on the aspects of actuarial modelling that constitutes a prerequisite to become a fully qualified actuary in many European actuarial associations, taking into account the core syllabus of the International Actuarial Association.
